

**CALL FOR PAPERS**  
Sixth International Conference on  
**Formal Structures for Computation and Deduction (FSCD 2021)**  
*July 17 – July 24, 2021, Buenos Aires, Argentina*

<https://fscd2021.dc.uba.ar/>

In-cooperation with ACM SIGLOG and SIGPLAN

NOTE: Due to the Covid 19 pandemic situation, the 2021 edition of FSCD and its satellite workshops will be held online.

**PROGRAM COMMITTEE CHAIR**

Naoki Kobayashi The University of Tokyo  
[fscd2021@easychair.org](mailto:fscd2021@easychair.org)

**PROGRAM COMMITTEE**

M. Ayala-Rincón Universidade de Brasília  
S. Berardi University of Torino  
F. Blanqui INRIA  
E. Bonelli Stevens Institute of Technology  
É. Contejean CNRS, Université Paris-Saclay  
T. Coquand University of Gothenburg  
T. Ehrhard Université de Paris, CNRS  
S. Escobar Univ. Politécnica de València  
J. Espírito Santo University of Minho  
C. Faggian Université de Paris, CNRS  
A. Felty University of Ottawa  
S. Figueira Universidad de Buenos Aires  
M. Fiore University of Cambridge  
M. Gaboardi Boston University  
S. Ghilezan University of Novi Sad  
I. Hasuo National Institute of Informatics  
D. Kesner Université de Paris  
R. Krebbers Radboud University Nijmegen  
T. Kutsia Johannes Kepler University Linz  
B. König University of Duisburg-Essen  
M. Lenisa University of Udine  
N. Nishida Nagoya University  
L. Ong University of Oxford  
P. Parys University of Warsaw  
J. Rehof TU Dortmund University  
C. Rocha Pontificia Univ. Javeriana Cali  
A. Silva University College London  
A. Tiu Australian National University  
S. Winkler University of Verona  
H. Yang KAIST, South Korea

**CONFERENCE CHAIR**

Alejandro Díaz-Caro Quilmes Univ. & ICC/CONICET

**WORKSHOP CHAIRS**

Mauricio Ayala-Rincón Universidade de Brasília  
Carlos López Pombo Universidad de Buenos Aires

**PUBLICITY CHAIR**

Carsten Fuhs Birkbeck, University of London

**SUBMISSION GUIDELINES** Submissions must be formatted using the LIPIcs style files and submitted via EasyChair: <https://easychair.org/conferences/?conf=fscd2021>. Submissions can be made in two categories. Regular research papers are limited to 15 pages, excluding references and appendices. They must present original research which is unpublished and not submitted elsewhere. System descriptions are limited to 15 pages, excluding references. They must present new software tools, or significantly new versions of such tools, in which FSCD topics play an important role. An archive of the code with instructions on how to install and run the tool must be submitted. In addition, a webpage where the system can be experimented with should be provided. Additional instructions on submitting a paper can be found on the conference web site. **One author of an accepted paper is expected to present it at the conference.**

**IMPORTANT DATES** All deadlines are midnight anywhere-on-earth (AoE); late submissions will not be considered.

**Abstract:** February 12-16, 2021 **Rebuttal:** April 2-5, 2021 **Final version:** May 3, 2021  
**Submission:** February 15-22, 2021 **Notification:** April 19, 2021 **Main Conference:** July 19 – July 22, 2021

**BEST PAPER AWARD BY JUNIOR RESEARCHERS** The program committee will select a paper in which at least one author is a junior researcher, i.e. either a student or whose PhD award date is less than three years from the first day of the meeting. Other authors should declare to the PC Chair that at least 50% of contribution is made by the junior researcher(s).

FSCD (<https://fscd-conference.org/>) covers all aspects of formal structures for computation and deduction from theoretical foundations to applications. Building on two communities, RTA (Rewriting Techniques and Applications) and TLCA (Typed Lambda Calculi and Applications), FSCD embraces their core topics and broadens their scope to closely related areas in logics, models of computation, semantics and verification in new challenging areas.

The suggested, but not exclusive, list of topics for submission is:

1. Calculi: Rewriting systems (string, term, higher-order, graph, conditional, modulo, infinitary, etc.); Lambda calculus; Logics (first-order, higher-order, equational, modal, linear, classical, constructive, etc.); Proof theory (natural deduction, sequent calculus, proof nets, etc.); Type theory and logical frameworks; Homotopy type theory; Quantum calculi.
2. Methods in Computation and Deduction: Type systems (polymorphism, dependent, recursive, intersection, session, etc.); Induction, coinduction; Matching, unification, completion, orderings; Strategies (normalization, completeness, etc.); Tree automata; Model building and model checking; Proof search and theorem proving; Constraint solving and decision procedures.
3. Semantics: Operational semantics and abstract machines; Game Semantics and applications; Domain theory and categorical models; Quantitative models (timing, probabilities, etc.); Quantum computation and emerging models in computation.
4. Algorithmic Analysis and Transformations of Formal Systems: Type Inference and type checking; Abstract Interpretation; Complexity analysis and implicit computational complexity; Checking termination, confluence, derivational complexity and related properties; Symbolic computation.
5. Tools and Applications: Programming and proof environments; Verification tools; Proof assistants and interactive theorem provers; Applications in industry; Applications of formal systems in other sciences.
6. Semantics and Verification in new challenging areas: Certification; Security; Blockchain protocols; Data Bases; Deep learning and machine learning algorithms; Planning.

**PUBLICATION** The proceedings will be published as an electronic volume in the Leibniz International Proceedings in Informatics (LIPIcs) of Schloss Dagstuhl. All LIPIcs proceedings are open access.

**SPECIAL ISSUE** A special issue of Logical Methods in Computer Science is planned.
