CALL FOR PAPERS

Fifth International Conference on

Formal Structures for Computation and Deduction (FSCD 2021)

July 19 – July 25, 2021, Buenos Aires, Argentina

PROGRAM COMMITTEE CHAIR
Naoki Kobayashi   The University of Tokyo
`fscd2021@easychair.org`

PROGRAM COMMITTEE
M. Ayala-Rincón	Universidade de Brasília
S. Berardi	University of Torino
F. Blanqui	INRIA
E. Bonelli	Stevens Institute of Technology
É. Contejean	CNRS, Université Paris-Saclay
T. Coquand	University of Gothenburg
T. Ehrhard	Université de Paris, CNRS
S. Escobar	Univ. Politècnica de València
J. Espírito Santo	University of Minho
C. Faggian	Université de Paris, CNRS
A. Felty	University of Ottawa
S. Figueira	Universidad de Buenos Aires
M. Fiore	University of Cambridge
M. Gaboardi	Boston University
S. Ghilezan	University of Novi Sad
I. Hasuo	National Institute of Informatics
D. Kesner	Université de Paris
R. Krebbers	Radboud University Nijmegen
T. Kutsia	Johannes Kepler University Linz
B. König	University of Duisburg-Essen
M. Lenisa	University of Udine
N. Nishida	Nagoya University
L. Ong	University of Oxford
P. Parys	University of Warsaw
J. Rehof	TU Dortmund University
C. Rocha	Pontificia Univ. Javeriana Cali
A. Silva	University College London
N. Szasz	Universidad ORT Uruguay
A. Tiu	Australian National University
S. Winkler	University of Verona
H. Yang	KAIST, South Korea

CONFERENCE CHAIR
Alejandro Díaz-Caro Quilmes Univ. & ICC/CONICET

WORKSHOP CHAIRS
Mauricio Ayala-Rincón Universidade de Brasília
Carlos López Pombo   Universidad de Buenos Aires

PUBLICITY CHAIR
Sandra Alves   University of Porto

FSCD (`http://fscd-conference.org/`) covers all aspects of formal structures for computation and deduction from theoretical foundations to applications. Building on two communities, RTA (Rewriting Techniques and Applications) and TLCA (Typed Lambda Calculi and Applications), FSCD embraces their core topics and broadens their scope to closely related areas in logics, models of computation, semantics and verification in new challenging areas.

The suggested, but not exclusive, list of topics for submission is:

1. Calculi: Rewriting systems (string, term, higher-order, graph, conditional, modulo, infinitary, etc.); Lambda calculus; Logics (first-order, higher-order, equational, modal, linear, classical, constructive, etc.); Proof theory (natural deduction, sequent calculus, proof nets, etc.); Type theory and logical frameworks; Homotopy type theory; Quantum calculi.

2. Methods in Computation and Deduction: Type systems (polymorphism, dependent, recursive, intersection, session, etc.); Induction, coinduction; Matching, unification, completion, orderings; Strategies (normalization, completeness, etc.); Tree automata; Model building and model checking; Proof search and theorem proving; Constraint solving and decision procedures.

3. Semantics: Operational semantics and abstract machines; Game Semantics and applications; Domain theory and categorical models; Quantitative models (timing, probabilities, etc.); Quantum computation and emerging models in computation.

4. Algorithmic Analysis and Transformations of Formal Systems: Type Inference and type checking; Abstract Interpretation; Complexity analysis and implicit computational complexity; Checking termination, confluence, derivational complexity and related properties; Symbolic computation.

5. Tools and Applications: Programming and proof environments; Verification tools; Proof assistants and interactive theorem provers; Applications in industry; Applications of formal systems in other sciences.

6. Semantics and Verification in new challenging areas: Certification; Security; Blockchain protocols; Data Bases; Deep learning and machine learning algorithms; Planning.

PUBLICATION The proceedings will be published as an electronic volume in the Leibniz International Proceedings in Informatics (LIPIcs) of Schloss Dagstuhl. All LIPIcs proceedings are open access.

SPECIAL ISSUE A special issue of Logical Methods in Computer Science is planned.

SUBMISSION GUIDELINES Submissions can be made in two categories. Regular research papers are limited to 15 pages, excluding references and appendices. They must present original research which is unpublished and not submitted elsewhere. System descriptions are limited to 15 pages, excluding references. They must present new software tools, or significantly new versions of such tools, in which FSCD topics play an important role. An archive of the code with instructions on how to install and run the tool must be submitted. In addition, a webpage where the system can be experimented with should be provided. Additional instructions on submitting a paper can be found on the conference web site. **One author of an accepted paper is expected to present it at the conference**.

IMPORTANT DATES All deadlines are midnight anywhere-on-earth (AoE); late submissions will not be considered.

Abstract:	February 12, 2021	Rebuttal:	April 2-5, 2021	Final version:	May 3, 2021
Submission:	February 15, 2021	Notification:	April 19, 2021		

BEST PAPER AWARD BY JUNIOR RESEARCHERS The program committee will select a paper in which at least one author is a junior researcher, i.e. either a student or whose PhD award date is less than three years from the first day of the meeting. Other authors should declare to the PC Chair that at least 50% of contribution is made by the junior researcher(s).
